

COLLEGE OF JOURNALISM AND MASS COMMUNICATIONS

Creative Brief: The Sandbox

Why are we communicating?

Sandbox- your one stop shop for all things food, drinks, and fun, is coming to Lincoln in April 2025! With six outdoor sand volleyball courts, eight pickleball courts, corn hole and several other yard games, fire pits, and a rooftop deck there are options for everyone.

Who is our target audience?

For college students and young adults who want to eat, stay active, meet new people, and have a good time in a more mature, off campus environment.

Given our reasoning for communicating, what's the single most important thing we know about our target audience?

College students are always looking for new places to try, ways to destress, and even ways to meet new people but don't necessarily want to be glued to campus. It is also reasonable to assume that most college students don't have a lot of extra money to spend so whatever activities they choose/places they go must be affordable.

What does our target audience currently think about our product?

Currently it is hard to say what college students think about Sandbox since most of the reviews are from middle aged adults or families. However, we know that college students enjoy other similar places such as Top Golf and are interested in a lot of the activities and events that we offer.

What do we want our audience to think about our product?

We want students to think this is an affordable place to find some entertainment away from campus. Our goal is that Sandbox is a welcoming place for everyone with multiple different activities and events that interest several different demographics.

What basic promise addressing the target's self-interests can we make to guide our target to that new understanding of our product?

Sandbox is an affordable and fun way to stay active and meet new people.

What evidence supports our basic promise?

- Food/drinks are affordable or standard restaurant prices, but we also offer specific deals and happy hours
- Leagues and tournaments are also affordable making it easy to join or attract participants
- Several different leagues/activities are offered so you can be as active or as laid back as you desire
- With rooftop seating options as well as game opportunities mingling and meeting new people is easy
- There are multiple events including trivia nights and watch parties to attract a more diverse crowd

What tactics and media should we use to communicate this information? Why?

Tiktok- posting videos of what happens at current location as well as updates on the new location being built; a majority of the people in our target audience are active on tiktok or know someone who is

Instagram/Facebook- updates about new location and promotions; current locations already have Facebook accounts so it would be easy to advertise a new location, and it will also reach a larger audience

Flyers- handing out flyers about a grand opening or other promotional events on campus; this is where it will be easiest to reach our target audience and a great way to spread awareness about the business

Radio/Spotify/Apple Music ads- talk about new location and what events are being held or even share customer reviews; everyone listens to music on one platform or another and most do not have premium subscriptions that you can skip ads
